Attention: The Secretary, Daniela Tronson

Dear Ms Tronson

**Revetment Wall and Fish Cleaning Facility Design  
Lakehaven Drive – Sussex Inlet**

Shoalhaven City Council wishes to seek feedback from your organisation regarding the proposed revetment wall and improved facilities at the Lakehaven Drive Boat Ramp, Sussex Inlet. Please see attached concept plans.

This project aims to address the existing timber retaining wall and concrete slab north of the boat ramp that has been significantly damaged due to recent storm events. This timber retaining wall is proposed to be replaced with a revetment wall constructed from natural sandstone blocks of varying sizes, which has been implemented at other locations across the Shoalhaven to promote fish habitats and enhance the site's aesthetic appeal (e.g. Woollamia Boat Ramp).

The proposal also considers the erection of a new fish-cleaning facility, which will increase the usability of the site.

The proposed works have been split into 2 stages:

- Stage 1: All deliverables north of the boat ramp, including:
  - replacing the failed timber retaining wall with the proposed sandstone revetment wall, and
  - reinstatement of fish cleaning facility.
- Stage 2: All deliverables south of the boat ramp, including:
  - replacing the existing timber retaining wall with the proposed sandstone revetment wall.

It is Council's intention to address Stage 1 as a priority, in order to replace and repair the damaged infrastructure at the northern end of the site.

At this stage, Council would appreciate your organisation's feedback on this proposal. If you could please provide feedback before 28 March 2023 that would be appreciated.

If you need further information about this matter, please contact me on (02) 4429 3315. Please quote Council's reference 71352E (D23/73046).

Yours faithfully
